RECOMMENDATION LETTER

26.04.2022

To whom it may concern

I have pleasure in writing this letter of recommendation for Mr. Shubhadip Nag who is intending to apply for MS Research in your university. I have known him for more than 3 and half years as an undergraduate student, where I took courses in the field of Computer Science and Engineering.

He attended my classes on C programming, Design and analysis of Algorithm, Artificial intelligence, Machine learning and Natural Language Processing. During this tenure, I found he had developed strong knowledge in these fields and had good analytical skills too. Being a Computer Science student, his keen interest in computational skills and application of these skills in projects had impressed me a lot. He has a great application power. He is very good at mapping any problem to real world situation.

I am his final year project guide. The name of the project in which currency he is working on is "Automatic Identification of Multilingual Word in a Text".

He is highly motivated, and always eager to learn something new. He has a good understanding of the fundamentals of Computer Science and engineering which will surely help him a great deal in future studies and research.

He is also a very good communicator and actively participated in class discussions. His sense of discipline and ability to work hard are worth mentioning.

To summarize in nutshell, Mr. Shubhadip Nag possesses high level of moral and ethical standards, self-confidence, technical skills, and communication skills and is always motivated to take up new challenges. I am sure his talents will be suitably utilized and proven in your organization if an opportunity is given.

Dr. Alok Ranjan Pal

Assistant Professor,

Department of Computer Science and Engineering,

College of Engineering & Management, Kolaghat
