Subject: Letter of Appreciation for Shubhadip Nag

To Whom It May Concern,

It is with immense pleasure and profound gratitude that I write this letter to express my highest support for Shubhadip Nag. I graduated in 2026 with a B.Tech in Computer Science and Engineering from IIT Kharagpur and currently work as a Software Engineer at Adobe. Throughout my academic journey, Shubhadip served as my Bachelor's Technology Project (BTP) mentor, and his guidance was the cornerstone of my most significant achievements.

In addition to his mentorship, Shubhadip was the Teaching Assistant for two of my courses: Machine Learning and Scalable Data Mining. Whenever he got the chance to take classes, his teaching quality was exceptionally good. He possesses a rare talent for breaking down complex concepts, explaining tough topics so easily that they become completely accessible to students.

During my BTP, Shubhadip exhibited an extraordinary depth of both theoretical and technical knowledge. His expertise in Artificial Intelligence, particularly across Machine Learning, Large Language Models (LLMs), and Reinforcement Learning (RL), is truly exceptional. Under his direct mentorship, we tackled complex theoretical roadblocks and built highly robust architectures. His invaluable input and hands-on guidance culminated in a major academic milestone: together, we successfully published our research paper at a NeurIPS workshop in 2025.

Shubhadip's mentorship also extended well beyond formal university research. During my undergraduate studies, I participated in and won several national-level hackathons. Shubhadip was a constant pillar of support throughout these intense competitions, always available to offer strategic advice, help conceptualize solutions, and guide my overall technical approach.

Beyond his formidable technical acumen, what truly sets Shubhadip apart is his exceptional quality as a life mentor. He provided invaluable advice, helping me navigate the high-pressure environment of competitive academia, shaping my career trajectory, and preparing me for my current role at Adobe. His empathy and encouragement created a safe environment where I felt confident to experiment, push boundaries, and ultimately grow as an engineer.

Shubhadip is a remarkable researcher, a profoundly dedicated mentor, and an outstanding individual. Any team or institution would be incredibly fortunate to benefit from his expertise and leadership. I offer my highest praise and endorsement for Shubhadip Nag, confident he will continue to elevate everyone he works with.

Sincerely,

Agniva Saha
